ECC006 – Homework #3

Web Development Course — Debugging Exercises

Question 1

The background color is `#0066CC` (dark blue), so to ensure good contrast the text color must be white. The header block must use the Arial font family. The two missing HTML tags are the closing `</style>` and `</head>` tags.

Completed code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <title>Trillium Media Design</title>
  <meta charset="utf-8">
  <style>
    body {
      background-color: #0066CC;
      color: white;
    }
    header {
      font-family: Arial, sans-serif;
    }
  </style>
</head>
<body>
  <header><h1>Trillium Media Design</h1></header>
  <p>Our professional staff takes pride in its working
relationship
  with our clients by offering personalized services that listen
to
  their needs, develop their target areas, and incorporate these
  items into a website that works.</p>
</body>
</html>
```

Summary of filled-in blanks:

- `color: white;` — white text provides strong contrast against the dark blue background.

- `font-family: Arial, sans-serif;` — sets the header font to Arial as required.
- `</style>` — closes the CSS style block.
- `</head>` — closes the head section before the body begins.

Question 2

The page will not display properly because the `<style>` block inside `<head>` is never closed correctly. On the line after the CSS rules, the code reads:

```
  font-size: 1.2em; }
<style>       ← incorrect: opens a second style block instead of closing the first
</head>
```

It should be `</style>` (a closing tag), not `<style>` (an opening tag). Because the browser never sees `</style>`, it treats all subsequent HTML as raw CSS text, so the page body is either invisible or rendered without any styling.

Corrected line:

```
  font-size: 1.2em; }
</style>      ← correct closing tag
</head>
```
